

IGES SDG Interlinkages and Data Visualisation Web Tool

A User's Perspective

SNRD Asia and TUEWAS Joint Conference
14-17 May 2018 • Bangkok

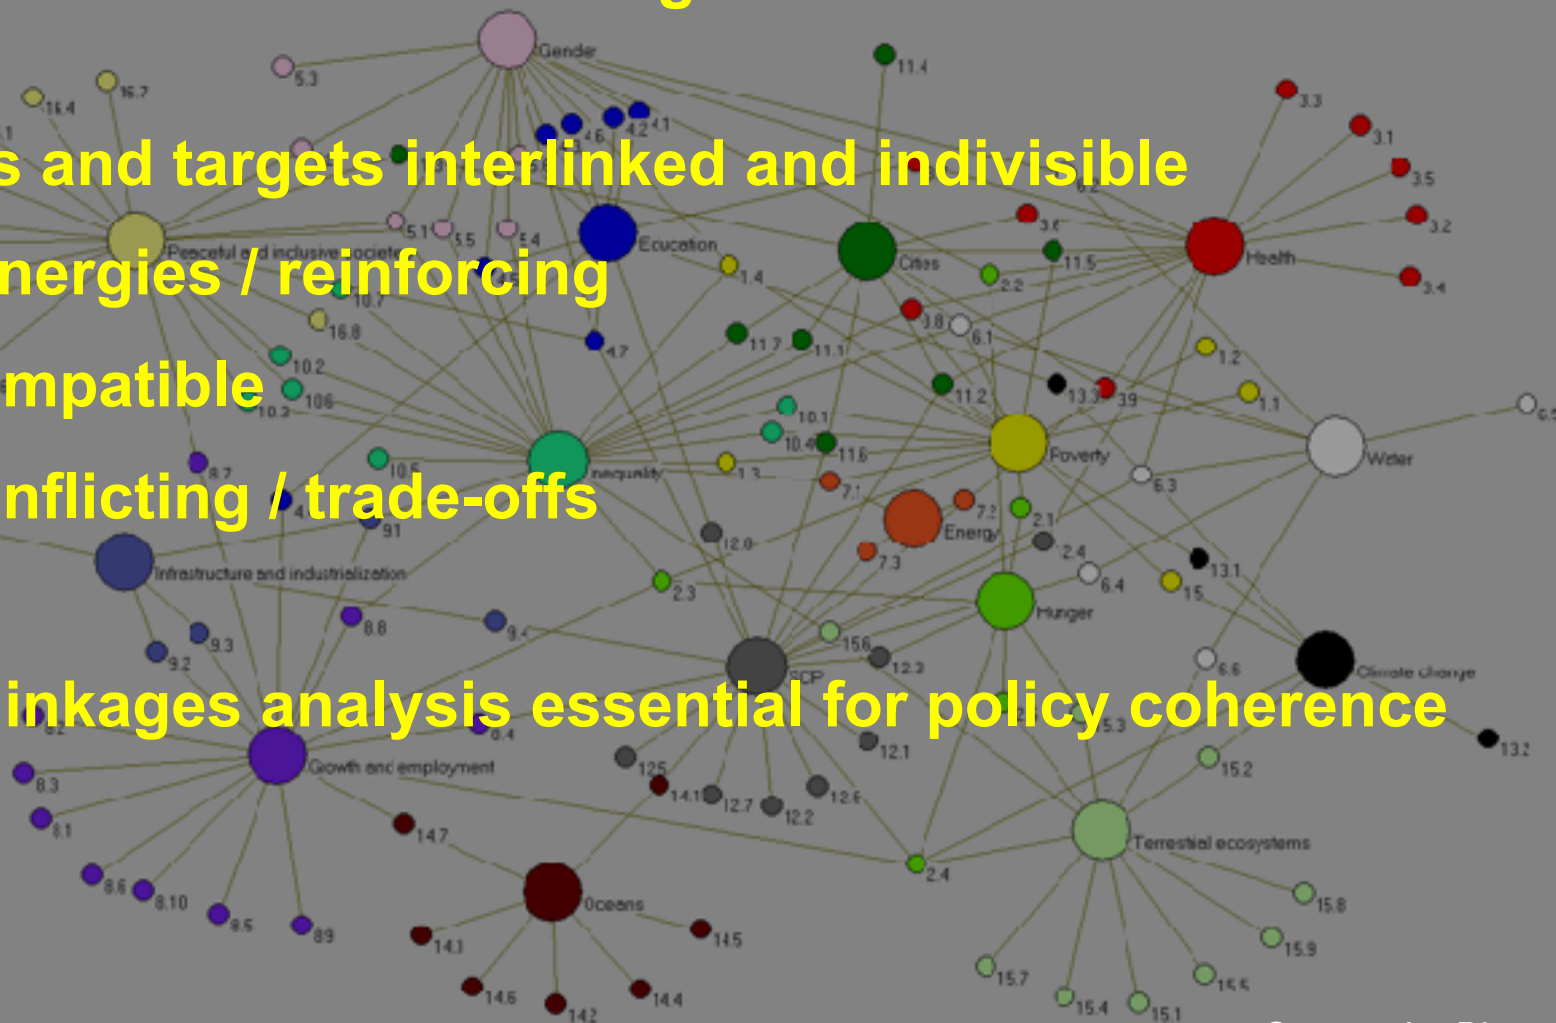

The SDGs as a network of targets

Goals and targets interlinked and indivisible

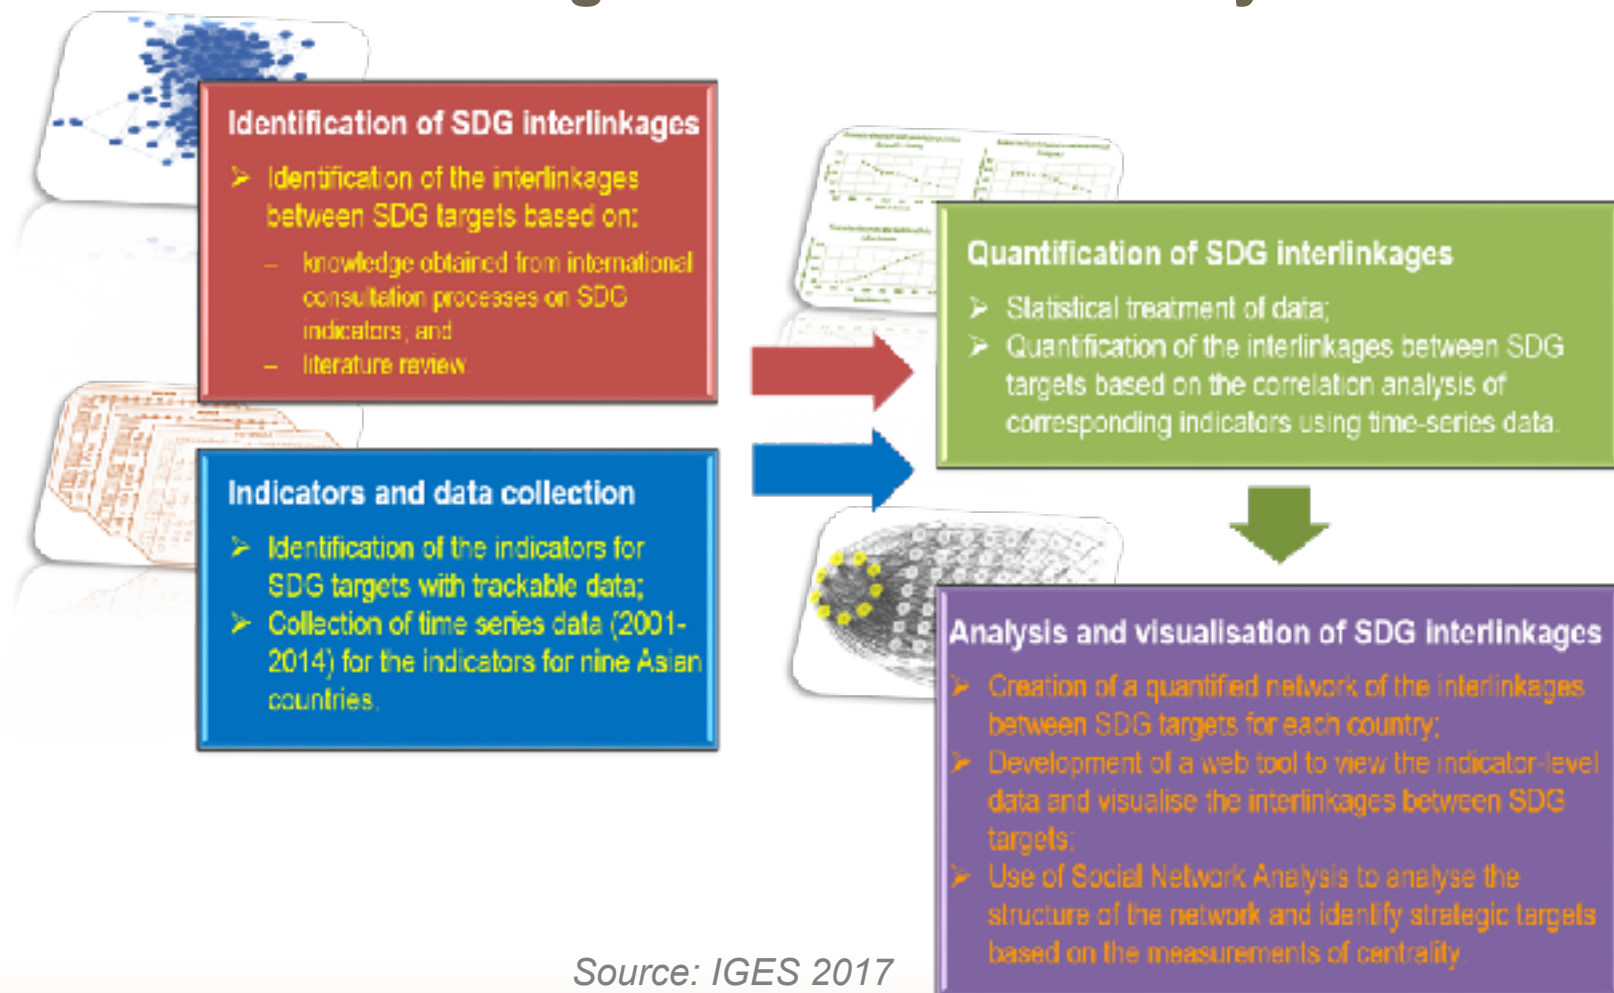

- Synergies / reinforcing
- Compatible
- Conflicting / trade-offs

Interlinkages analysis essential for policy coherence

Source: Le Blanc, 2015

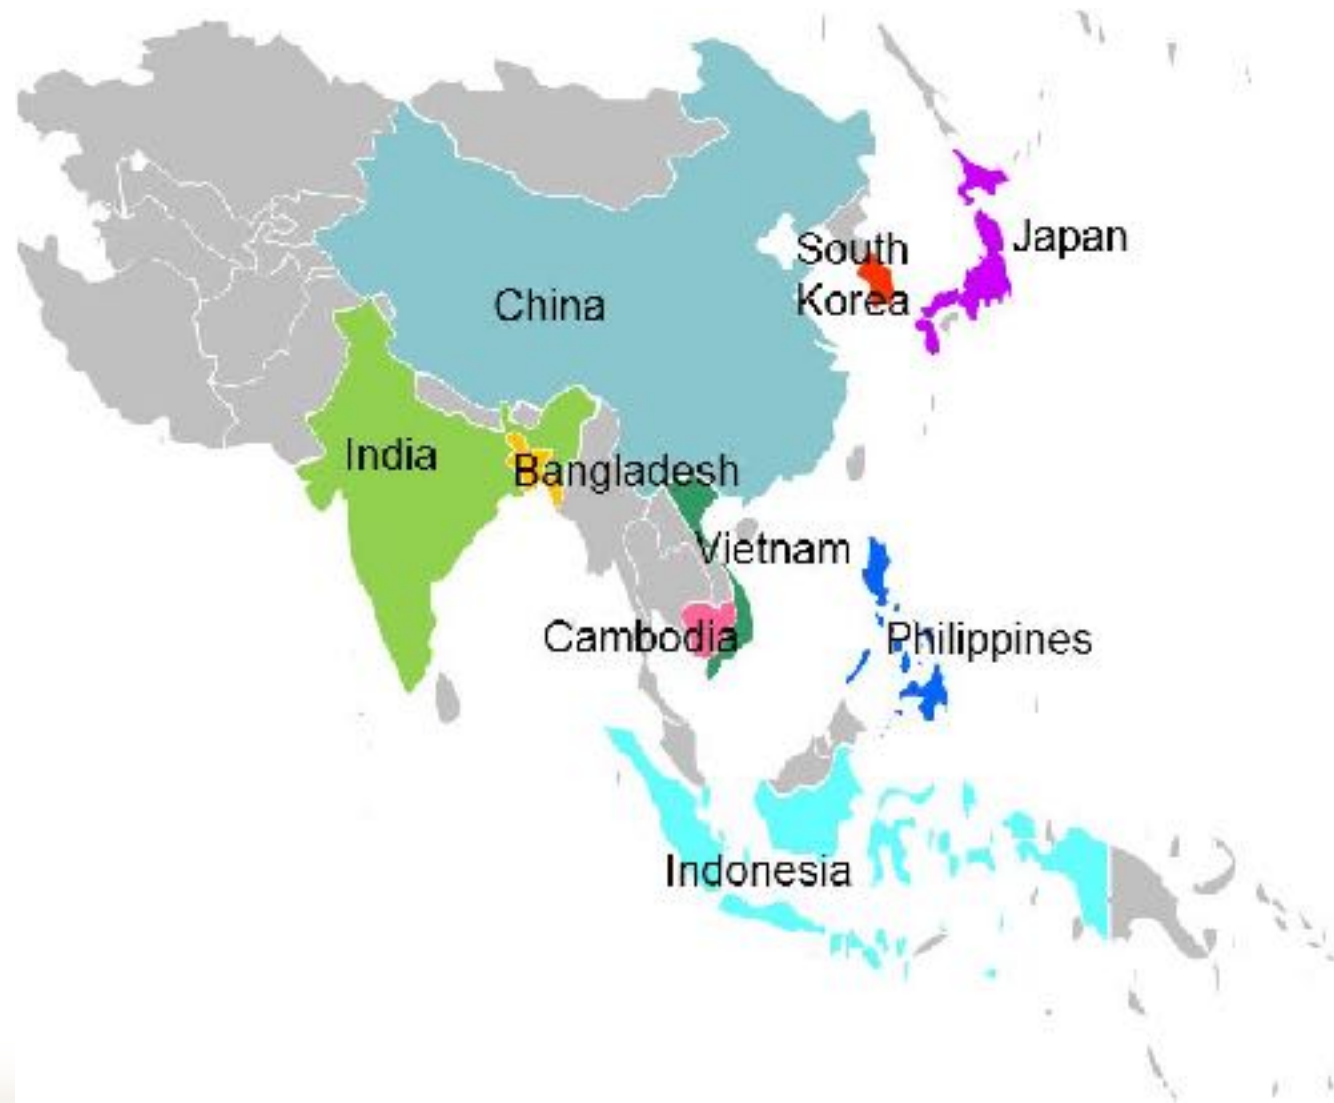

IGES: SDG Interlinkages and Network Analysis Framework

Source: IGES 2017

Nine Asian countries

SDG Interlinkages and Data Visualisation Web Tool

SDG Interlinkages and Data Visualisation

1 Select One Country

- ☐ Bangladesh
- ☐ Cambodia
- ☐ China
- ☒ India
- ☐ Indonesia
- ☐ Japan
- ☐ Republic of Korea
- ☐ Philippines
- ☐ Viet Nam

How to use:

1. Select only one country.
2. Select one or more Goals.
3. Select/Deselect SDG Target(s) and related Indicator(s) for the selected Goal(s).
4. Your selected Target(s) and related Indicator(s) appear here. You can select/deselect Target(s) and Indicator(s) from this list.
5. You can view and download the data (as CSV file) on your selected Indicator(s) by clicking on "Export Table".
6. You can view and download the interlinkages chart of

2 Select Sustainable Development Goals (SDGs)

3 Select SDG Targets & Indicators (See more)

- ☐ Goal 1. No poverty
- ☒ 1.1 End extreme poverty
Population below \$1.90 (2011 PPP) per day
- ☐ 1.2 Halve national poverty
Population below national poverty line
- ☐ 1.3 Implement social protection systems to the poor
Government expenditure on health
- ☐ 1.4 Full access to basic services and economic resources
Data not available

4 Data display [Country:India]

NO.	INDICATORS/SHORTNAME	UNIT	2001	2002	2003	2004	2005	2006	2007	2008	2009	2011
1	Population below \$1.90 (2011 PPP) per day	percent				38.21						31.1

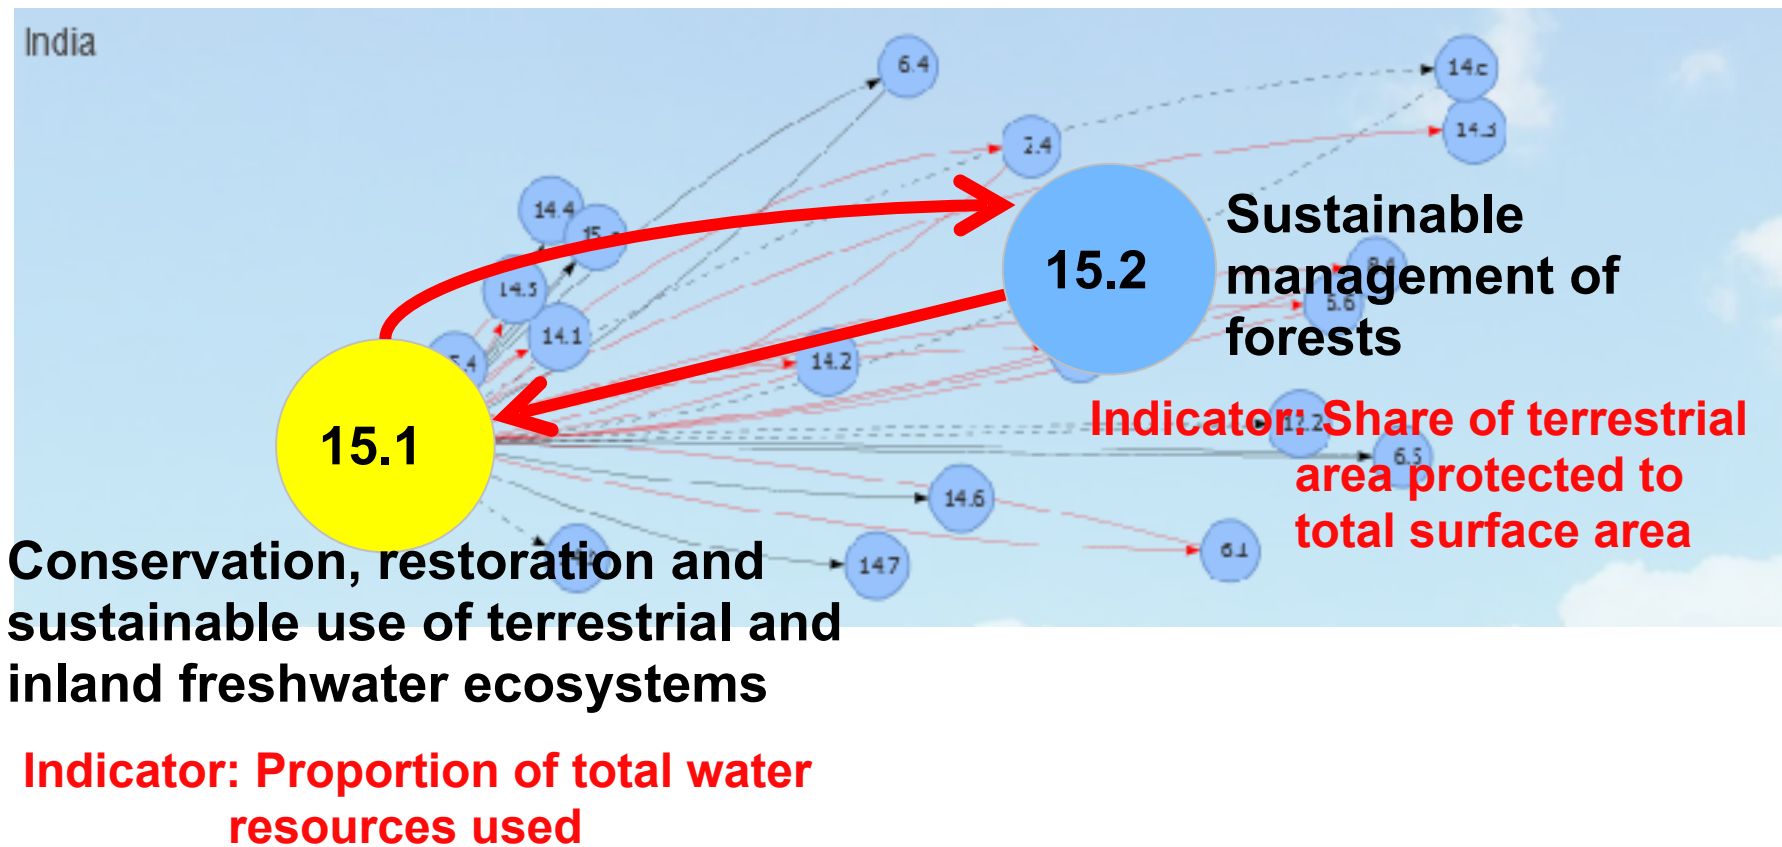

5 Visualisation of interlinkages in a network

India

Note: i) Each node represents one SDG Target, e.g. Target 1.1, with yellow ones indicating the selected targets.
ii) Each line with an arrow linking two nodes represents a directional/causal link between two Targets, e.g. from Target 1.1 to Target 1.2. The value over the line (by putting the cursor on the line) indicates the strength of the linear relation between the pair of targets.

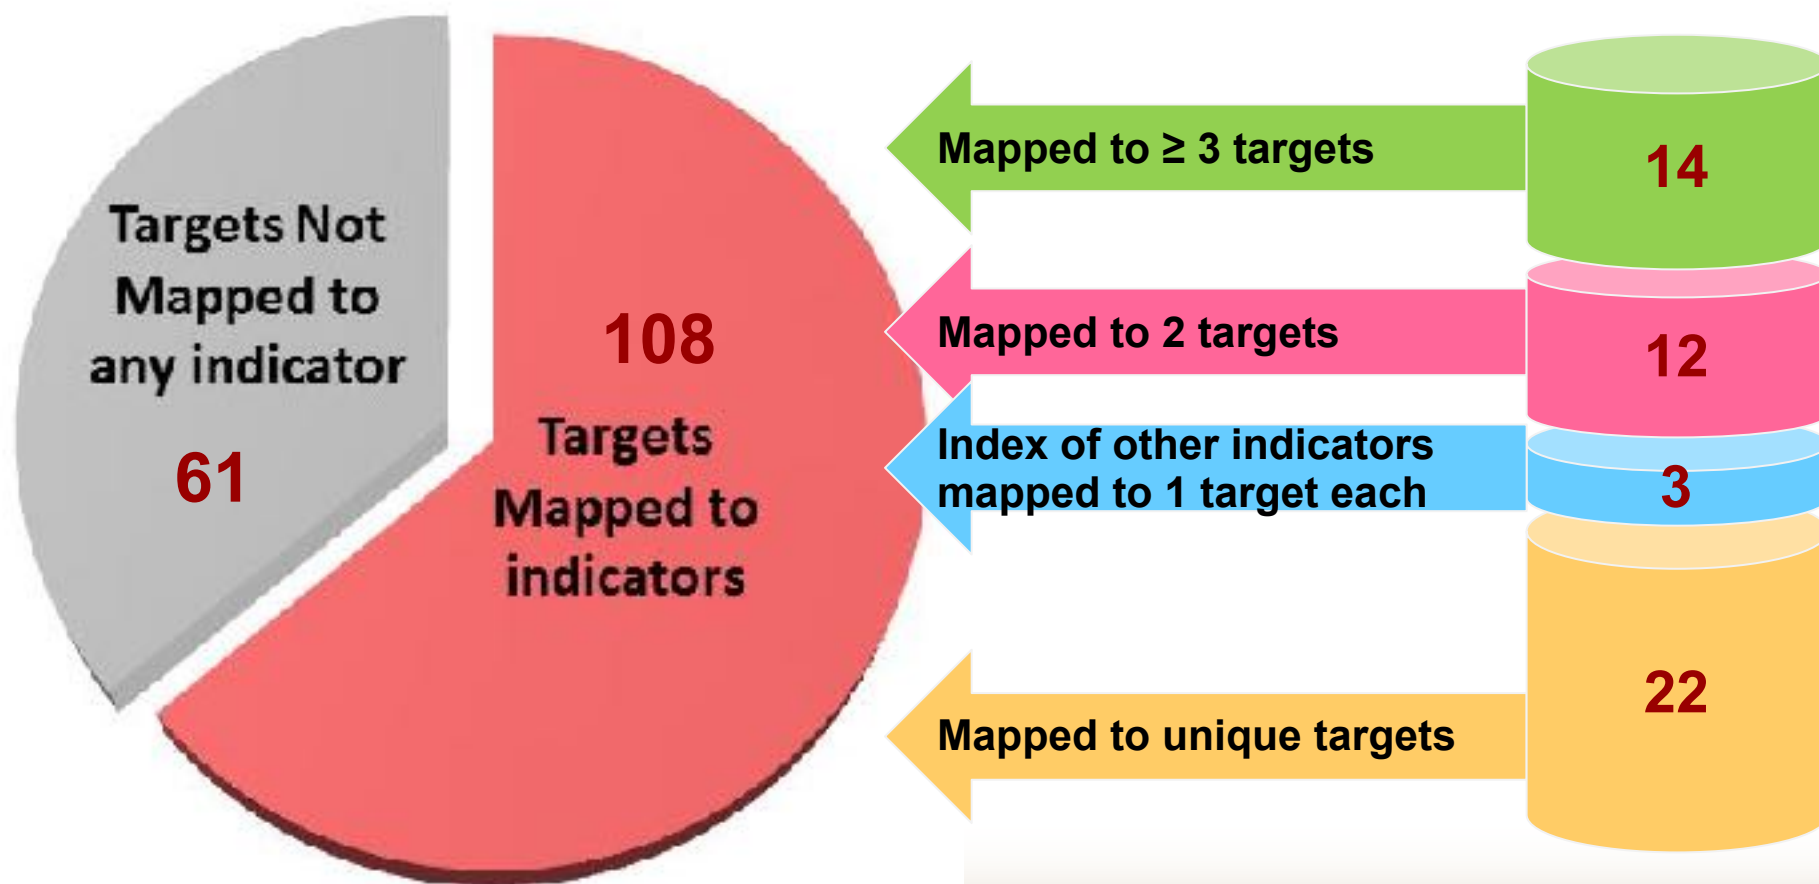

Interlinkages between Target 15.1 and others in India (IGES 2017)

SDG Targets and IGES Indicators

Targets = 169

Indicators = 51

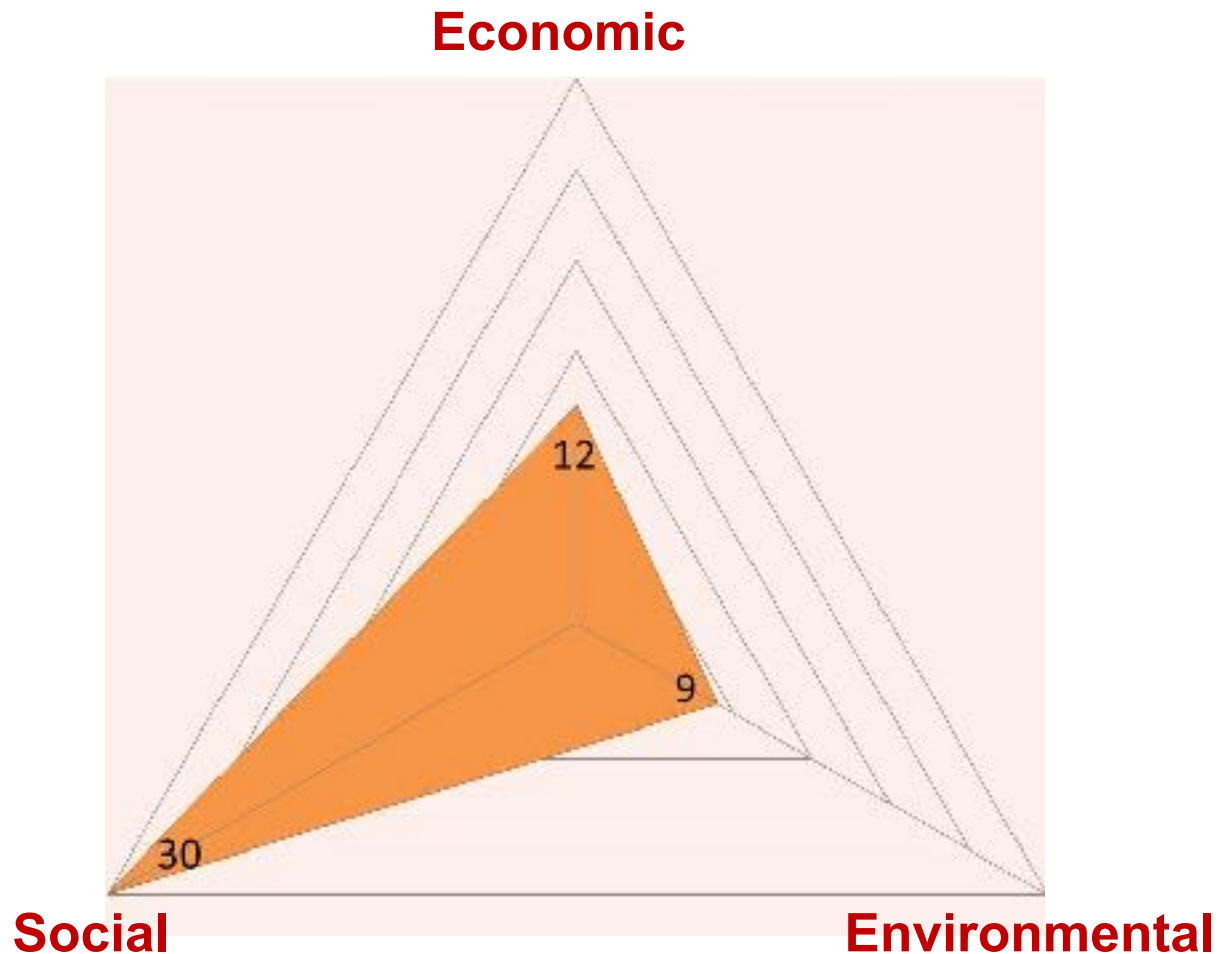

Composition of Proxy Indicators

Imbalance in selection of indicators

Limitations of the web visualisation tool

- Limited indicators and data sets?
- Appropriateness of the selected proxy indicators?
- Correlation \Rightarrow Causality? Logic?
- Covers only binary linear relationship. Circular or multiple interlinkages not captured.
- Missing context specificities (e.g. political positions, culture, societal attitude, resource richness, etc.)?

Won't provide robust causal relationships among SDG targets for decision making at national or sub-national levels.

Lessons learnt

Before using any IT tool for decision support:

- ✓ Check closely what is its framework logic
- ✓ Are the design elements of the tool appropriate and sufficient
- ✓ Are the results consistent and logical
- ✓ Does it makes sense

**Thank you for
your attention.**
